

Dear Simin Cai,

We are pleased to share some exciting news with you!

GoFoton! Corp's PEACOC HD Fiber Platform for Port Monitoring Applications is being honored as a finalist in the 2018 Lightwave Innovation Reviews in the Carrier Fiber, Cable, Enclosures and Accessories category.

Your product was specifically recognized for excellence and innovation.

Judge's Comment: "Accomplishes the dual fiber-management innovation of allowing technicians to access and manage a small-form-factor connection without disrupting adjacent connections."

Thank you for the innovation and impact you bring to the optical communications industry! You are part of a select group of companies being acknowledged in the industry's most prestigious product review program.

Your entry was submitted by Michael Zammit, whose efforts resulted in an entry that truly resonated with our independent judging panel.

Congratulations on your achievement and recognition and we look forward to seeing your continued impact on the optical communications industry.

Regards,
